About the Conference

The summit will provide a unique opportunity to neuroscientists and physicians to share their research and experiences with the leaders in their fields.

The program includes keynote speeches from internationally renowned scientists.

Each of these speakers helped to shape the modern concepts of neuroscience. In addition, there will be sessions for oral and poster presentations.

Presentations in these sessions will provide an overview of the cutting-edge technologies being used to address difficult therapeutic and theoretical issues in neuroscience.

NDS-2023 is unique in its approach of encouraging a dialogue between the basic and clinical scientists.

We expect to have these dialogues both during scientific sessions and networking time. We hope to make the summit particularly educational and inspiring for young scientists who will get an opportunity to interact with leading experts.

About the Organizer

USG-United Scientific Group (A non-profit scientific organization) is an expert-driven initiative with a vision to:

- Identify and bridge gaps in knowledge by creating and implementing new scientific and technology-specific platforms, forums and products to discuss bottleneck issues and incorporate recent research advances.
- Publish and promulgate innovative research findings with an ethical and stringent review process to make a step change in the fields of science and technology in society.
- Partner business and science for the translation of scientific discoveries and innovative ideas into implementable solutions and products which benefit mankind. The USG team is committed to work together to create network which delivers the best scientific solutions and contributes top services to the scientific community.
